SmartWater™

THE SMARTSHIELD™ SENSOR SYSTEM FROM GE SMARTWATER™

FLAMMABLE VAPOR RESISTANT DESIGN – The SmartShield Sensor System automatically shuts down the water heater if flammable vapors are detected.

LOW EMISSION BURNER DESIGN – Helps protect the environment.

STANDARD REPLACEMENT PARTS – No special parts needed and easy to maintain to keep you in hot water.

SIMPLE PUSH BUTTON PILOT LIGHT IGNITION – Reliable, clean and easy. You'll never have to fumble with matches again.

NO FILTERS TO CLEAN – Unlike other designs, the SmartShield Sensor System requires no monthly maintenance and no filters to clean, service or replace.

**GE EXCLUSIVE FULL ONE YEAR
IN HOME WARRANTY.**

GE BRINGS YOU THESE SUPERIOR DESIGN FEATURES IN FLAMMABLE VAPOR TECHNOLOGY

▶ **INNOVATIVE AIR SHUT-OFF SYSTEM** – The SmartShield Sensor System completely seals the combustion chamber in a flammable vapor event, eliminating the hazards caused by a spill of flammable material, such as gasoline.

▶ **ENGINEERED TO LAST** – The SmartShield Sensor System assures long and efficient operation with three distinct features:

100% of combustion air is carefully controlled by our high performance air intake.

Air enters the product from the sides and well above the floor, away from where dust tends to settle.

The air path leading to the arrestor plate contains flow baffles, carefully controlling combustion air and reduces accumulation of lint, dust, and oil.
