

As a part of our continuing commitment to comply with all applicable federal and state laws, GE Appliances provides the following information under the chemical-content reporting law enacted by California in 2021, AB-1200. AB-1200 requires the disclosure of the presence of any of over 3300 chemicals, including common metals like copper, nickel, iron, and aluminum, when present in the food contact surfaces or handles of cookware. The presence of a chemical on the below list does not mean that the product is unsafe or poses a health risk.

The AB-1200 Reporting Lists provided below are lists of chemicals for which California requires disclosure under AB-1200. The lists can be accessed at: <https://dtsc.ca.gov/scp/authoritative-lists/>.
